AURORA _ The Colorado Energy Science Center and the City of Aurora are partnering to bring homeowners a free educational workshop and tour of a home that recently won a home energy makeover.

The workshop will be held from 9 a.m. to noon, Saturday, March 24 in the City Council Chambers of the Aurora Municipal Center, located at 15151 E. Alameda Parkway. After a lunch break, workshop participants are invited to tour the home of Wayne and Cheryl McDonald, who recently had more than XXX in energy efficient improvements completed on their home.

Workshop participants will learn about energy audits, the importance of proper insulation, energy efficient windows and heating and cooling systems.

Registration is required and space is limited. To register, visit www.smartenergyliving.org, or call the workshop line at 303-216-2026 ext 150.

About Smart Energy Living:

Smart Energy Living is the consumer education program of Colorado Energy Science Center (CESC), a non profit energy education organization founded by the managing partners of the National Renewable Energy Laboratory. Visit www.SmartEnergyLiving.org for more information.
